**For Immediate Release:**

## **SMALL SCALE HOT TUB DELIVERS BIG HYDROTHERAPY**

*Sundance Launches the New Dover™ Spa, Part of Mid-Range 780 Series™*

— As the lot size of new homes continues to shrink, some homeowners struggle to maximize the limited space available in their backyards. One way to pack assured relaxation into the constrained square footage of a small patio or deck is the addition of a self-contained hot tub. The new Dover model from Sundance offers the perfect solution for empty nester's who want to treat themselves to a relaxing Hydro therapy massage in Crystal clear water.

With a small-scale footprint of only 69" x 82" (175.5 cm x 208.5 cm) and seating for three, the Dover supplies high-quality hydrotherapy by condensing many features that are usually reserved for larger spas. Each seat in this spa offers a different water massage experience and is handsomely equipped with an array of jets from Sundance's patented, high-performance, Fluidix™ jet family. The Dover delivers customizable invigoration through 22 hydrotherapy jets in all.

Master-designed for relaxation, this hot tub also includes a comfortable pillow at every seat and a tranquil AquaSheer™ spill-over waterfall that can be enjoyed at any time. The multi-color SunRay™ system illuminates the night with a glow both above and below the waterline through the LED-lighted waterfall and also around topside control knobs.

To make installation in tight spaces easy, the Dover stands a mere 30.5" (77.5 cm) tall, allowing it to fit through narrow gates or doorways. Simplified setup continues with an optional 120 volt electrical configuration, for 'plug and play' ease.

The Dover incorporates a 20" slip stream filter with circulation pump to continuously clean the water as it moves over the 2- stage filtration system. Adding a Sun Purity Pack to clarify and soften the water will lock in your Alkalinity and Ph values and reduce chemical consumption.
